FEEDBACK ANALYSIS REPORT OF STUDENTS Session 2020-21

To maintain and continue the quality of the curriculum feedback system plays a pivotal role in an educational institution. Feedback from student on syllabus is an important measure for the enrichment of the quality of the curriculum. Barbhag College is affiliated to Gauhati University and follows the syllabus prescribed by the university. The College takes resort to a specific feedback system for various stakeholder's feedback analysis. The IQAC of Barbhag College prepared a well-designed questionnaire where both teachers and students give response to the strength and weakness of the curriculum.

Process of Feedback Collection:

- Students: Student's feedback is taken during final semester classes. Privacy was maintained while collecting the responses of the questionnaire. The response of the questionnaire was collected by a team of faculty appointed by IQAC.

Details of Analysis of Feedback

The period from March 2020 to September 2021 is not at all favourable for the development of the academic atmosphere as Covid 19 pandemic was spreading rapidly in every nook and corner of Assam. During the academic session 2020-21 a total number of 893 students were studying in the final semester classes of BA and BSc programme and the feedback form on syllabus and its transaction has been distributed offline to the student out of which 27 percent responded to it that is 240 feedback forms on curriculum returned and the basis of the response given by students it has come to light that most of the students express satisfaction at the syllabus of the Gauhati University. In comparison with the academic session 2019-20 there is a significant improvement in the case of response to the feedback system by the students. FINDINGS

As per analysis of the feedback submitted by the student it has become clear that the students are more or less satisfied at the syllabus prescribed by the affiliating University. But there is no denying the face that the spreading of Covid pandemic has posed a challenge in completing the syllabus within the stipulated period. Though the online learning platform is going on yet to what extend it will serve the expected goal is uncertain as our students are not accustomed to this practice of learning.

**REPORT OF FIELD SURVEY
DEPARTMENT OF ECONOMICS
MARCH, 2022**

The students (five) of B.A. 3rd semester with Economics honours conducted a survey in March, 2022 on the Socio-Economic Condition in different aspects such as livelihood sources, saving behaviour, Consumption pattern etc of rural people of the nearby villages of the college in the supervision of Dr. Nandita Goswami and Gitanjali Goswami. The students found that the average monthly income of the rural families is Rs. 34800 which varies from Rs. 16500 to Rs. 9000 with coefficient of variation of 101.6 percent, but the average monthly expenditure of the families is Rs. 17945 and it varies from Rs. 6250 to Rs. 37350 with coefficient of variation of 46.8 percent. Thus there is wide variation in income among the rural families but the difference is relatively less for expenditure. The rural families spend a major portion of their expenditure for food followed by travel, clothing, fuel (LPG and electricity), TV and mobile recharge, education, health etc. On an average, the rural families save almost 31 percent of their income and they mostly save their deposits in banks (85 percent) and post office (15 percent). The occupational structure of the rural families is shown in the following table.

Sl. no	Occupation	Percentage of families	
		As primary source	As secondary source
1	Farming	5	15
2	Government job	30	5
3	Private job	35	40
4	Business	10	5
5	Daily wage earning	20	35
6	Total	100	100
Source: Field survey			

The table shows that the primary source of livelihood of 35 percent of the rural families is private sector job followed by Government job of 30 percent families. The secondary source of livelihood of 40 percent families is also private job followed by daily wage of 35 percent families. Moreover, one student of the said semester conducted her survey on the Self- Help groups of two villages of Barbhag area. She found five SHGs in villages Moura and Sonkuriha and each of them have ten members. Of these SHGs, three of are promoted by bank, one is by block and the other is self promoted. Three (60 percent) of these SHGs are engaged in economic activities like fish keeping, weaving and agricultural farming and the other two are engaged in

accumulating savings of the members and in providing loans. The average annual profit of the SHGs engaging in economic activities is Rs. 29300.
